LGS Accessibility Accommodations Support Process

Accommodation Need Identified

A student new to Emory or newly in need of an accommodation registers with the Department of Accessibility Services (DAS)

Registration with DAS will require a student to submit documentation from a licensed professional, detailing the disability and relevant details to support the student’s request for accommodations

Engaging with DAS

DAS will review student’s registration and respond by approving accommodations, requesting more information, or denying accommodations and explaining rationale and next steps

If academic, clinical, or laboratory accommodations are developed, students must request accommodation letters EACH TERM for which accommodations are needed

Accommodation Implementation

Student will then provide faculty member(s) with accommodation letter and should verify each professor has received it

If a student believes an approved accommodation is not being honored by a faculty member, please contact DAS and LGS Student Affairs immediately

NOTE: It is up to students to share accommodation needs with faculty and others who have direct or indirect involvement in their academic success and/or implementing their accommodation plan. DGS/PD/PAs are unable to notify instructors of student accommodations. The student must do this. Disability information must remain confidential. Any information a student with a disability shares should be used solely and specifically for arranging reasonable accommodations for the course of study. All communications between instructor and student regarding accommodations must remain private.
