

## Our Degree Tracker

### Lab sessions are :

- Direct channels for you to learn more about Degree Tracker.
- Opportunities for us to gather how best we can support you.
- Gateways for mutual engagement and meaningful collaboration.

## WELCOME TO *Fall* 2021

## Degree Tracker Implementation - On Track!

In line with the Office of the University Registrar's goal to implement Degree Tracker to each School and streamline academic tracking as well as graduation screening, our projects are progressing accordingly. As we finalize our engagement with Candler School of Theology, we are taking on Laney's PHD programs as well as remaining majors in the School of Nursing.

This fall, we also plan to begin working with the School of Law and then School of Medicine afterwards - on course to making Degree Tracker a University wide tracking tool!

An ongoing project that ECAS owns and one designed to alleviate some known pain points in Degree Tracker, delivered a crucial enhancement beginning of summer 21 by making special topic titles visible on Degree Tracker student reports.

The College initially assessed Departments' feedback on Degree Tracker, identified critical elements needing improvement and launched a project participating VB Consulting, Emory Up & the Office of the University Registrar.

While this joint project is still in progress, visibility of special topic course titles is one aspect that is completed and is already adding to the ease and convenience of using Degree Tracker. The excitement about this feature is much felt when students or staff would like to know which particular topic is counting and when a manual exception should be put in without needing to refer to a student's transcript to see the particular topic title.
